

ISPRA

ISTITUTO STATALE DI PROTEZIONE AMBIENTALE: It provides general guidance to regional HARPS, for a proper ecological and sustainable water management.

STATO

MINISTERO DELL'AMBIENTE

DISTRETTO IDROGRAFICO APPENNINO MERIDIONALE

The river basin districts have been established with the Decree 152 of 2006. Currently being organized, the river basin of the southern Appenine will refer to the Department of the Environment and will perform the functions of the 'former AUTHORITIES' OF the WATERSHED.

AUTORITA' DI BACINO IDROGRAFICO

managed the "water bodies." At present the Authorities' tasks have been delegated to the 'Water District'.

REGIONE MOLISE.

It is the main governing body for local water management.

ARPA MOLISE, AGENZIA REGIONALE DI PROTEZIONE AMBIENTALE monitors and measures the quality of the region's waters, according to the indications of ISPRA.

PROTEZIONE CIVILE it is the SERVICE guaranteed by the Region, in coordination with the National Civil Protection, which MONITORS the territory, managing the PREVENTION FROM DISASTERS and gives assistance in case of disaster.

COMUNI: currently they are dealing with the water distribution, sewerage and wastewater treatment (S.I.I.), under the direct management of the Department of the Environment.

AMBITI TERRITORIALI OTTIMALI (ATO)

were formed by groups of municipalities that provided indications to each municipality to carry out S.I.I. (Integrated water service); abrogated the ATO in 2009, it now tries to turn them into a "consortium" (Egam) that provides a "PLAN AREA" which, subsequently, the municipalities would apply in the management of S.I.I.

AGENZIE/ENTI STUMENTALI :

both ARPA and MOLISE ACQUE agency are INSTRUMENTAL BODIES, because they are the REGION's tools aimed at the regional water management.

MOLISE ACQUE it is an agency which is responsible for the management of the water services, it is to say of the CAPTURE, of the GREAT SUPPLY of regional or interregional relevance, and of the MAINTENANCE of the plants.

EGAM, Ente di Governo dell'Ambito del Molise

should become, in the future, a new agency that will join the S.I.I. (Previously managed by the municipalities indicated by ATO) and specific competences of "Molise Acque"; in particular in the next months EGAM will exercise the powers of the municipalities and will entrust to a "third party", ie to another company, the direct management of S.I.I.
